PROFESSIONAL SUMMARY

- Technical Support Engineer with 1.5+ years of customer-facing experience across application support, SaaS/product support, CRM-based ticket handling, software troubleshooting, customer communication, and remote support.
- Currently supporting Autodesk software customers through Salesforce CRM, Omni-Channel, chat, and email workflows, with hands-on exposure to licensing, installation, account access, product-use questions, and application issue diagnosis.
- Best aligned with Application Support Analyst, Product Support Specialist, Technical Support Engineer, Help Desk, L1 Support, and SaaS Support roles that require SLA discipline, CSAT ownership, accurate documentation, and escalation-ready troubleshooting.

CAREER SNAPSHOT

- Experience:** 1.5+ years in technical support, application support, product support, ticket handling, and customer-facing troubleshooting.
- Support Channels:** Remote support, email support, chat support, CRM case handling, customer follow-up, and call-support readiness.
- Quality:** Consistently performed above a 92-93% CSAT benchmark, with support quality typically reaching the 95-97% range.
- Job Preference:** Remote / Work From Home support roles in India for Application Support, Technical Support, Product Support, SaaS Support, and Help Desk.

CORE COMPETENCIES

Role Focus: Application Support Analyst, Technical Support Engineer, Product Support Specialist, L1 Support Engineer, SaaS Support Specialist, Help Desk Support, Remote Support Specialist, Customer Support Associate, IT Support Analyst.

Customer Communication: Email support, chat support, remote support, call-support readiness, professional written communication, active listening, customer follow-up, global customer support, empathy, patience, and CSAT improvement.

Tools & Technologies: Microsoft 365, Windows support basics, browser troubleshooting, cloud computing basics, SSO/access-management awareness, FTP, SMTP, HTML, API fundamentals, SQL basics, Jira, Excel, Power BI, Python, Pandas, and software testing basics.

Documentation & Quality: Knowledge-base documentation, troubleshooting guides, case summaries, QA support, process documentation, new-hire enablement, quality checks, privacy awareness, and secure handling of customer information.

WORK EXPERIENCE

Technical Support Engineer - Autodesk Process | Gigmo Solutions | Remote / India | Jan 2025 - Present

- Provide remote technical, application, and product support for Autodesk software customers, resolving licensing, installation, account access, and product-use issues through Salesforce CRM, Omni-Channel, chat, and email support channels.
- Own end-to-end support cases by capturing symptoms, validating user details, analyzing issues, checking known solutions, documenting troubleshooting steps, and sharing clear resolution guidance with customers.
- Prioritize and follow up on assigned tickets to keep customer conversations active, support SLA expectations, reduce case aging, and maintain accurate case status across CRM workflows.
- Consistently performed above a 92-93% CSAT benchmark, with support quality typically reaching the 95-97% range through patient communication, complete case ownership, and accurate troubleshooting.
- Troubleshoot software access, installation, licensing, and workflow questions by reproducing issues where possible, reviewing internal knowledge resources, and escalating cases with clean technical context when required.
- Create clear case notes, root-cause observations, escalation summaries, and final resolution documentation to support handoffs, reporting, quality checks, and repeated-issue tracking.
- Use AI-assisted research tools, Microsoft 365, Excel, and internal knowledge-base resources to improve response quality, standardize troubleshooting notes, and reduce repeated support effort.
- Train new hires on Salesforce case handling, process workflows, customer communication standards, documentation expectations, and quality-focused ticket closure.
- Collaborate with operations and support teams to identify recurring product or process issues, improve troubleshooting notes, and support better customer outcomes.

Technical Support Intern | MIET Technical Support Team | Jammu, India | Dec 2022 - May 2023

- Assisted students and faculty with technical issues involving online learning platforms, system access, basic IT troubleshooting, and application-use questions.
- Supported system updates, recurring-issue documentation, and basic platform troubleshooting to reduce repeated support requests.
- Explained technical steps in a simple, patient, and customer-friendly way for non-technical users while supporting daily IT and platform operations.

EDUCATION

Bachelor of Technology, Computer Science and Engineering - Model Institute of Engineering and Technology, Jammu, India | Sep 2020 - Jun 2024 | CGPA: 8/10

CERTIFICATIONS

AWS Cloud Foundations | Google Cloud Data Analysis | Business Analysis by Microsoft

RELEVANT PROJECTS

- Social Media Trend Analyzer:** Built a Python, Pandas, and API-based dashboard for collecting, cleaning, and visualizing engagement metrics; strengthened API handling, data analysis, and troubleshooting skills.
- AI Fake Profile Detection:** Contributed front-end components and API integration for an AI-based detection application, improving usability, data presentation, and testing coordination.

LANGUAGES

Hindi: Fluent | English: Conversational proficiency; experienced in written chat and email support for global customers
